# Who We Are.

Duke Web Tech is a software company that helps small and medium-scale businesses with cloud-based software that increases productivity and efficiency across an organization.

Since our establishment on the 8th of November 2018, we have become the fastest-growing web technology company in Delta State Nigeria. Driven by innovation and hard work, we have helped clients within and outside Africa build and deploy functional cloud-based software, website, and mobile apps that improved their overall performance.

DUKE WEB TECH

# Company Vision, Mission and Core Values

### Vision

Our vision is to become one of African's leading tech company.

### Mission

1. To be innovative in product delivery and satisfy our clients with fully functional products.
2. To be more of solutions for clients than products.

### Core Values

- **Customer Success:** When our customers succeed, we succeed.

- **Innovation:** We build our success and future on the cornerstone of innovation.

# Company Services

**01**

### Custom Business Automation

We are constantly building web-based products to help automate workflows and ease the stress on business and employees in various industries.

**02**

### Software As A Service (SAAS)

Our software as a service model allows our clients to deploy the best-in-class solutions which we run and manage on their behalf. Letting the client focus on business whilst we focus on delivery.

**03**

### Mobile App Development

We develop mobile apps that exponentially help businesses increase their revenue by improving sales or introducing a new revenue stream.

**04**

### Website Design and Development

We provide you with a customized website design that's perfect for your business or personal purpose.

Lead Marketer

# Quality Assurance

| Activity | Approach |
| --- | --- |
| Brainstorming | We study the business requirements and brainstorm with the team to understand the project goals, target audience and industry benchmarks in order to ensure the best user experience for all stakeholders. |
| Design System | We design prototypes that align with the brand's design system influencing the user interface and experience across the site. This ensures consistency in buttons, icons, images and typography on desktops, tablets and mobile. |
| Unit Testing | We conduct testing on every functionality and integration done across devices and browsers. |
| Staging environment | We build and implement feedback on our servers. After user unit tests, we migrate to the production envioment on your server. |
